INTERNATIONAL CAE CONFERENCE AND EXHIBITION 2018

EVOLVING ENGINEERING
SIMULATION: THE AGE OF THE
DIGITAL TWIN

The principal event in Simulation Based Engineering and Sciences makes its annual return to serve international stakeholders from all sectors in academia, industry to research and software vendors.

This year the event will be held in
Vicenza, Italy,
on the 8th and 9th October.

The enriching two day conference driven by industrial peers' and pioneers interrogates traditional methods and approaches in engineering; opening an engineering network source of new and adopted ideas.

The event delivers a powerful platform to exchange exciting developments and achievements as well as, opportunities to explore emerging technologies and techniques accelerating leading organizations.

Discover additional opportunities to take part in the International CAE Conference and Exhibition: Conference Sponsorship, Exhibition Opportunities, Research Agorà and Poster Award

CALL FOR PAPERS

The International CAE Conference invites you to contribute to the 2-day programme to cover the landscape of Simulation Based Engineering and Sciences, to represent the outstanding achievements being made today and the prospects for the future.

Submit an abstract for your chance to present to a global audience of industry professionals to provide leading insights, illustrate success stories showcase engineering applications and/or technology adopted to embrace and overcome industry challenges.

All abstracts must be submitted for consideration by the 22nd June 2018 using the online submission form.

Abstracts (1000 Characters max.) should clearly state the paper title, author's name(s), organization, organization address, telephone number and email address. Also indicating the industry and technical topic of the paper.

Successful applicants will be informed by the conference committee. The full paper must be sent no later than the 14th September.

The presenting author must also register for the conference before the 15th July*.

**Failure of author to register for the accepted abstract will result in their removal from the Conference Programme and from the "Abstract Booklet" without prior notice.*

CONFERENCE THEMES

The conference welcomes papers covering the themes below, not only highlighting the value of engineering simulations, but also the pervasiveness of SBES, pushing the boundaries of simulation and moving towards the digital twin, as digital representations of devices as they operate in and pass through their entire life cycle.

Aerospace & Defence
Transportation
Smart Products & IoT
Industrial Machinery, Mechatronics and Systems Dynamics
Energy and Oil & Gas
Enabling Technologies
Metal Processing
Materials Modelling
System Engineering
Civil Engineering
